Subject area

Aesthetic learning processes in teacher education

Type of collaboration (e.g. joint course, research project or online workshop)

Visit / Experience sharing / Exploring collaboration opportunities

Invitation text / Details of collaboration

Introduction: I am a teacher at Uppsala University's teacher training programme, where I mainly teach art to teacher students. Our students will work in primary and lower secondary schools. I am the course leader for a course where students get tools to use art in subject integration with other subjects in order to strengthen learning.

Call for collaboration: I am interested in getting in touch with teachers who work with aesthetic learning processes in teacher education to share experiences and gain new perspectives. I am interested in visits where I can see how you work and meet teachers for dialogue.

In addition to my teaching job, I am a half-time doctoral student specializing in aesthetic learning processes and my research topic is sloyd (=craft) and idea development. If there is interest, I can share some of my research.

Note from ENLIGHT coordinator: Via ENLIGHT, it is possible for Uppsala University faculty to apply for contact grants up to EUR 5 000, for activities that strengthen relations between ENLIGHT universities. Bilateral visits can be financed by this grant, as well as by Erasmus staff mobility grants.
