

COMENIUS
UNIVERSITY
BRATISLAVA

THE
RIGHT
STEP

5X
YES

FOR BRATISLAVA

Success stories begin here

According to international rankings, Comenius University is among the top 3.5% of schools worldwide. We are the top-ranked Slovak university and are among the world's elite. We know the taste of success, and now you can, too.

Research has an actual impact

One of our university's facilities is the Comenius University Science Park, whose researchers participated in developing the Slovak test for COVID-19. Actual research is at the core of every one of our faculties. Researchers at our university produce over one-third of the top research output of all Slovak universities. We are pushing the boundaries of knowledge. Do you want to be a part of it?

A City That Lives

Small towns have their charm, and Bratislava is full of it. The city offers concerts, exhibitions, theatre performances, markets, festivals, and a vibrant nightlife. Bratislava is becoming increasingly popular among tourists. It is constantly evolving, offering a diverse range of experiences, flavours, and opportunities.

A Student City

Bratislava is not just the capital; it is also a city of students. More than 50,000 university students study and live here. But it's not just a place to study - it offers plenty of opportunities for active leisure, relaxation, and spending quality time with friends.

From City to City

Got a free weekend? Vienna is just around the corner, while Budapest and Prague are only a few hours away. In just five and a half hours by car, you can reach the sea, or in two hours, you can be at an Alpine ski resort with 26 km of slopes. Bratislava Airport offers direct flights to numerous destinations, including Barcelona, Rome, London, Skopje, and Athens - making it a perfect base for adventure!

EUROPEAN CITIES WITHIN REACH!

DORMITORIES: EVERYTHING UNDER ONE ROOF

Not within reach of the Bratislava Region's Integrated Transport System? In your first year, you are guaranteed a place in a dormitory. After that, securing accommodation depends on your own efforts. Visit <https://uniba.sk/en/services/accommodation/> for more information.

Student Life in the Dormitories

Most university students in Bratislava live in Mlynská Dolina. CU Mlyny accommodates more than 3,500 students, while CU Družba hosts around 2,000 students from faculties such as pharmacy, medicine, law, natural sciences, and education. The communal atmosphere makes it easy to meet new people.

Food Culture

Dormitory food is no longer just about survival. Thanks to several catering facilities, you can enjoy delicious meals throughout the day at student-friendly prices.

The City Within Reach

At CU Mlyny, you will find stationery shops with photocopying services, a post office, and laundry facilities. The nearby Cubicon shopping centre is just a short walk away. The legendary bus No. 39 takes you to the city centre and university faculties in about 10 minutes.

Make the Most of Your Time

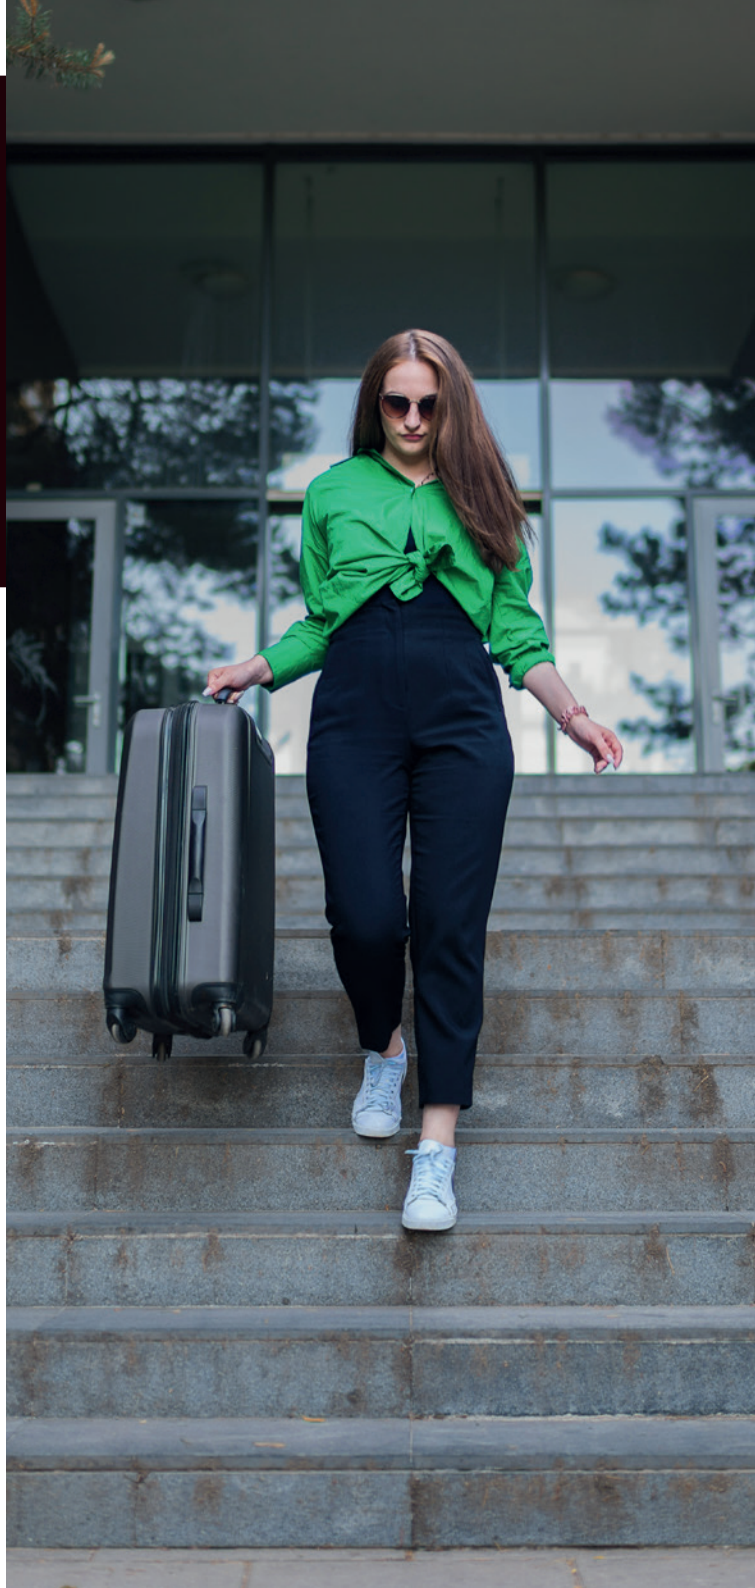

Don't stay in your room when you don't have to! Multi-purpose gyms, playgrounds, a workout zone, and bike lockers are all available. Student life comes alive through various businesses, cafés, and pubs.

Healthcare

The CU Družba campus has multiple GPs and a dentist, while a polyclinic is located near CU Mlyny. If you ever need support, a free Psychological Counselling and Career Service is available.

Spiritual Development

The University Pastoral Centres at CU Mlyny organise various formative, spiritual, and social activities. They also provide opportunities for sports and cultural events.

DO YOU WANT TO KNOW WHAT YOUR MONTHLY LIVING EXPENSES IN BRATISLAVA WOULD BE?

The average monthly expenditures of a university student in Slovakia range between 300 € and 400 €. Let's break it down:

accommodation in CU's dormitories	about 98 €/month (between 72 € and 174 €)
monthly public transport subscription	18 €
breakfast (in the dorm canteen)	about 2 €
lunch (in the dorm canteen)	about 3 €
dinner (in the dorm canteen)	about 3 €
pizza	about 4,80 €
printing/copying at the copy centre	0,10 € for A4
travelling by train	0 € for students

FACULTY OF MEDICINE

- ✓ **We prepare doctors and dentists for practice**
We offer two doctoral study programmes: general medicine and dentistry. The programmes take 6 years to complete and can only be studied in-person and full-time. Our excellent teachers maintain contacts with renowned partners from the most eminent European and American universities. We also offer postgraduate doctoral studies both in-house and externally, as well as specialization studies.
- ✓ **We use innovative methods of education**
We are intimately familiar with the specific nature of medical teaching. That is why we employ cutting-edge and innovative approaches that prepare our students to apply the acquired knowledge practically. We use modern methods to build their communication and practical skills. We also use sophisticated patient simulators in our teaching and have our own 3D bioprinter. We were the first in Slovakia to use virtual reality for anatomy teaching.
- ✓ **International Environment**
Our faculty is popular among students from abroad, who currently comprise almost a third of our students. This year, you will have colleagues from Germany, Japan, Poland, Ukraine, the United Kingdom, Greece, and other countries. Not only is this an opportunity to study in a multilingual environment, but you can also learn about the culture and traditions of different countries and start many lifelong friendships.
- ✓ **Active university life**
If you choose our faculty, expect ample social activities, a friendly atmosphere, and support from teachers and various student associations. You can also complete part of your study abroad through the Erasmus+ programme or study in an international environment through the ENLIGHT alliance.

FACULTY OF LAW

- ✓ **Beyond the boundaries of Slovak law**
At our faculty, you can study law in English at the bachelor's degree level, and at the master's degree level, you can study both EU law and international law in English.
- ✓ **Work on practical cases**
We combine over a century of tradition in legal education with innovative approaches. You will solve simulated cases (moot courts) and study clinical subjects regularly. We connect study and practice through the student-run legal advice project implemented in cooperation with the Slovak Bar Association.
- ✓ **A career in diplomacy? No problem!**
You can study at the Academy of Diplomacy to obtain a BLC (British Law Centre diploma), study the essentials of Austrian private law, or receive an E.MA (European master's in human rights and democratization) - our faculty offers all of these on your path to the international job market.
- ✓ **Internships during study**
We can arrange internships at dozens of institutions (e.g., The Slovak office of the Prosecutor General, the Slovak Parliament, the Office of the Slovak President, nearly any ministry, and the Slovak Supreme Court), where students can obtain experience working as lawyers, increasing their chances on the labour market.

FACULTY OF ARTS

- ✓ **Master Languages, Explore Central Europe**
The **Central European Studies** programme offers a unique opportunity to master two Central European languages while gaining deep cultural insight into the region. Combining language studies with history, culture, and social issues, it equips you for international careers. You will develop a strong understanding of intercultural communication, cultural differences, and the socio-political landscape of Central Europe, enabling you to navigate and overcome language and cultural barriers.
- ✓ **Skills for Life**
Apply your knowledge confidently in both academic and professional settings. Develop teamwork, problem-solving, and critical thinking skills while gaining a deeper awareness of ethical and social contexts. Improve your foreign language proficiency—listening, reading, speaking, and writing—while also learning to translate, interpret, and serve as a cultural mediator.
- ✓ **Top-notch**
Top experts, prestigious research grants, modern interpreting classrooms, a stress research lab, and a dendrochronological lab for archaeology teaching – these and many other advantages are available if you study at Slovakia's largest humanities and social sciences faculty.
- ✓ **You co-create the faculty**
There are student theatres and clubs, and you can contribute to the faculty-wide magazine Pod čiarou (Below the line), actively participate in discussions on current affairs, or enjoy exhibitions, events, and films. A community centre, UniverSaal, is also being developed.

FACULTY OF NATURAL SCIENCES

- ✓ **The whole world is learning from us**
Our researchers developed a process that can significantly shorten the production of a flu medicine; they discovered a new protein, Dbl2, which can repair damaged genetic information (DNA); they participated in mapping the three-dimensional structure of the PatA enzyme, which has led to a significant advance in the fight against tuberculosis. And that's just a fraction of our ongoing research in biology, environmental science, geography, geology, and chemistry.
- ✓ **Nature is our life**
Our fulfilment and intrigue are in finding solutions to the climate crisis and protecting nature and health. With us, you can participate in projects to improve public health, safeguard habitats and animal and plant species, restore critical natural areas, or remediate the geological environment and environmental burdens.
- ✓ **At our faculty, you won't be buried in books**
The Himalayas, Iceland, Mexico, Tanzania, and Honduras that's just a small sample of what awaits you. Suppose you decide to study natural sciences in Slovak or English. In that case, you can use top-notch laboratories and participate in field research and professional excursions in attractive locations.
- ✓ **We are a community**
Make new friends and join the Sladké Drievko (Liquorice) student botanical club, the Dobrá myseľ (Sound mind) community garden, geoscience clubs, or physical education camps.

FACULTY OF PHARMACY

- ✓ **A Europe-wide degree**
The pharmacy programme is a 5-year full-time master's study programme taught in English. Our pharmacy degree is recognised throughout the EU in the regulated health-care profession of pharmacy. The curriculum is fully compatible with European universities.
- ✓ **Stay Connected to Practice**
For 20 years, pharmacy students have been gaining hands-on experience through a six-month internship in line with EU standards. Pharmacy graduates enter the profession well-prepared and competent. Beyond traditional pharmacies, students can also explore internships with future employers in various pharmacy-related fields.
- ✓ **The labour market needs you**
The demand for pharmacy graduates continues to rise. Pharmacists enjoy strong job security across multiple sectors, including community and hospital pharmacies, healthcare facilities, pharmaceutical manufacturing, distribution, regulatory bodies, quality and safety control, scientific research, and education.
- ✓ **Be Part of Something Bigger**
In 2023, the Slovak Association of Pharmacy Students was named **Student Organisation of the Year**. Their enthusiasm is contagious—so join us and make the most of your student life!

JESSENIUS FACULTY OF MEDICINE

- ✓ **Our students are more than medical doctors**
You will graduate with a thorough understanding of medical sciences, clinical procedures, and patient care. Our programme emphasises both theoretical knowledge and practical experience, equipping students with the skills necessary to excel in the medical field. Our alumni include many successful medical doctors and researchers working at renowned facilities in Slovakia and abroad.
- ✓ **We are at the cutting edge**
Simulation-based teaching and hands-on clinical practice ensure you'll develop the practical skills needed to succeed in healthcare. The faculty simulation center, featuring audio-visual technologies that enable 3D transmission and recording of surgeries all give the study a more intense and realistic dimension, enhancing the learning experience and sparking a more profound curiosity and drive to learn more. Education at our faculty will be further enhanced once the biobank is finished and a recently approved new university hospital in Martin is completed.
- ✓ **Open to the world**
Do you want to experience the international academic atmosphere of large university cities? Our faculty's study of medicine brings together a diverse group of international students and creates a rich, collaborative learning environment. Almost 50% of our students are international students, mainly from Norway and Iceland.
- ✓ **The Martin club of medics**
JFMED organises various workshops and training for students to enhance their practical skills in medicine and expand their knowledge in other fields needed to practice the medical profession. Our faculty also helps arrange internships and international student stays in hospitals or clinics.

FACULTY OF MATHEMATICS, PHYSICS AND INFORMATICS

- ✓ **Humbly, we are the best**
We rank as the best natural sciences faculty, improving Comenius University's overall position in global rankings. We offer state-of-the-art research facilities, our own nuclear and accelerator technology center, a center for complex systems, an astronomical and geophysical observatory, and a laboratory for future computer technologies.
- ✓ **We offer choice**
Study data science, bioinformatics, economic and financial mathematics, renewable resources, energy, environmental physics, teaching, and other study programmes. We offer a wide array of possibilities.
- ✓ **Labour office? No, thank you**
Our alumni don't look for jobs; the jobs look for them. FMPI graduates are employed in research and development centres, banks, global IT companies, in energy, advertising, and the creative industries. Several of our graduates have made it to world-class scientific institutions (NASA, CERN, etc.).
- ✓ **With us, you won't turn into nerds**
You can also treat yourself to various other activities, including non-traditional sports like headis, disc golf, kayaking, or indoor bouldering. Sign up for the vocal-instrumental musical group Vocalatté. Become a part of Trojsten (Trihedron), a civic association that organises competitions and workshops, and a summer school in mathematics, physics, and computer science for elementary and secondary school students.

FACULTY OF MANAGEMENT

- ✓ **Meet Inspiring People**
We believe that a well-rounded business education extends beyond the classroom. Our programmes incorporate a strong international focus, exposing students to global business practices and diverse cultural experiences. Engaging in these international opportunities will enhance your language and intercultural communication skills while deepening your understanding of global markets. A dedicated team of experienced lecturers, combined with strong industry connections, ensures that you receive cutting-edge knowledge and practical insights—preparing you to lead in today's interconnected business world.
- ✓ **Stay Local or Go Global**
There's no need to go abroad to study in English—we offer accredited **bachelor's and master's programmes in management** entirely in English. Additionally, we provide a **Law and Management** study programme in collaboration with the Faculty of Law at Comenius University. However, if you're eager to explore international opportunities, take advantage of our foreign mobility programmes—**up to 80% of our full-time students** spend at least one semester studying or interning at a foreign university to gain valuable international experience.
- ✓ **A Guaranteed Path to Success**
More than **80% of our students** gain work experience in their field during their studies, and **up to 70% of full-time students** secure employment or start their own business before graduation. Our graduates earn **the highest starting salaries among all faculties of social sciences**—a testament to the quality and relevance of our education.

FACULTY OF SOCIAL AND ECONOMIC SCIENCES

- ✓ **Bet on quality**
Up to 96% of our alumni secure a job within six months of graduating – and you could be one of them. Our English programmes in Psychology and European studies provide valuable experience in a supportive environment where you'll receive constructive feedback to help you grow. We believe university should be a place where mistakes are not just allowed but embraced as part of the learning journey. Learn from top experts, connect with like-minded peers, and take the next step toward your future.
- ✓ **Juggling your schedule is not a survival game**
At FSES, you will take, on average, five subjects per semester. This means you'll have fewer exams, but be careful - it's not a doozy. Some subjects are taught in English, and lectures feature interesting guests - state secretaries, journalists, or festival organisers. We also emphasise practical experience; internships are included in every study programme.
- ✓ **Go abroad!**
FSES offers high-quality studies comparable to the best European schools. And we want you to find out for yourself! That is why we encourage students to complete at least one semester of study abroad on Erasmus+ mobility.
- ✓ **We know that life is more than studying**
When studying at our faculty, you will visit the Slovak parliament, ministries, embassies, and perhaps the European Union Agency for Fundamental Rights (FRA). You can grow herbs or have a picnic in our community garden. The faculty holds an annual FSES fest. Your initiative is always appreciated if you want to organise a discussion, screen a film, or plan something completely different.
