

## *Outline of the description of the habilitation and inauguration proceedings*

### *1. Definition of the subject of habilitation proceedings and inaugural proceedings*

**Name of the university:** Comenius University Bratislava

**University seat:** Šafárikovo námestie 6, 814 99 Bratislava

**University identification number:** 00397865

**Faculty name:** Jessenius Faculty of Medicine

**Faculty seat:** Malá Hora 10701/4A, 03601 Martin, Slovak Republic

**Name of the habilitation and inauguration proceedings:** Dentistry

**Valid decision to grant the rights:** Decision number: 2018/4183:8-15A0,

Text of the decision: Granting without any time limitations.

**Contents definition:** Dentistry is a medically scientific field that deals with anatomy, physiology and pathology of the stomatognathic system. It also includes interdisciplinary pathological conditions of other systems of the organism, related to manifestations in the oral and maxillofacial area. It is focused on the prevention, diagnosis and differential diagnosis of acquired and congenital diseases, anomalies and all pathological conditions in the oral and maxillofacial area, as well as tissues and organs associated with them anatomically and functionally related. It cooperates closely with other medical fields such as otorinolaryngology, neurosurgery, internal medicine, oncology, paediatrics, dermatovenerology and many others. The study programme of dentistry consists of three basic subdivisions: therapeutic dentistry, orthopaedic dentistry and dentoalveolar and maxillofacial surgery. Therapeutic dentistry deals with the diagnosis and treatment of diseases of hard dental tissues, dental marrow and support structures within the conservative dentistry and its main two branches of cariology and endodontics. Preventive dentistry plays an important role in clinical disciplines. Periodontology deals with diseases of the hanging system of teeth, oral medicine local and systemic pathological changes of mucous membranes of the oral cavity. Pediatric dentistry focuses mainly on the prevention and treatment of tooth decay and its complications in deciduous, mixed and permanent teeth, taking into account the anatomical and functional specificities of the child's age. In the framework of orthopedic dentistry, prosthetic dentistry is dedicated to solving missing teeth and reconstructing soft and bone tissues with fixed and removable dentures. The role of orthodontics is to diagnose and treat the wrong position of the teeth and the congenital and acquired anomalies of the jaw and facial skeleton. Dentoalveolar surgery includes minor oral surgery. Maxillofacial surgery deals with the diagnosis and treatment of injuries, congenital and acquired diseases of the oral, and maxillofacial areas, with adjacent regions and organs. Most often these include surgical procedures related to the treatment of hard and soft tissues cysts of head and neck area, inflammations, diseases of the salivary glands, temporomandibular joint disorders, cancers and developmental anomalies.

**Degree awarded:** associate professor (docent, doc.); professor (prof.)

**Assignment to the field of study(s):** Dentistry

Within the study field of Dentistry, the faculty has accredited the following study programs of the 3rd degree: Dentistry

### *2. Staffing of the habilitation and inauguration proceedings*

**persons responsible for the H&IP:**

**prof. MUDr. Jarmila Procházková, CSc.**

doc. MUDr. Mária Janíčková, PhD., MPH

doc. MUDr. Tomáš Siebert, PhD.
