Contents definition:

Chemistry is one of the basic scientific disciplines that plays a primary role in our understanding of material phenomena and our ability to control them. Solving basic and applied chemical problems is of key and strategic importance for man. As a result of the intensive increase in knowledge, chemistry as a whole has already been divided into several areas in the past.

Nuclear chemistry is part of the trend of peaceful use of nuclear energy in the area of electricity security. Field of study is necessary for training specialists in radioecology, nuclear medicine and other fields where ionizing radiation is applied in the field of science and practice.

Degree awarded: associate professor (docent, doc.); professor (prof.)

Assignment to the field of study(s): Chemistry

Within the study field of General medicine, the faculty has accredited the following study programs of the 3rd degree:

Analytical Chemistry

Inorganic Chemistry

Biochemistry

Physical Chemistry

Nuclear Chemistry and radiology

Organic Chemistry
