Text of the decision:	Granting without any time limitations

Contents definition:

The protection and use of the landscape is a part of ecological and environmental sciences, with regard to the spatial planning of the landscape. Ecozoology is implemented in the country, similar to spatial planning, urbanization and decision-making about land use. In order to know the issue of monitoring and evaluating the quality of the environment at the regional and global level, it is necessary to educate qualified specialists, environmentally and ecologically educated. A comprehensive approach to landscape care must also deal with the protection of biological and landscape ecological diversity, the revitalization and management of ecosystems, and the sustainable use of renewable and non-renewable natural resources.
