Contents definition:

Chemistry is one of the basic scientific disciplines that plays a primary role in our understanding of material phenomena and our ability to control them. Solving basic and applied chemical problems is of key and strategic importance for man. As a result of the intensive increase in knowledge, chemistry as a whole has already been divided into several areas in the past.

Organic chemistry is part of modern social trends that use chemical knowledge in various areas of human society, e.g. in the preparation of new materials, pharmaceuticals, agrochemicals, etc.

For the current and future stage of development, a significantly higher need for professionals in field of organic chemistry is assumed, as was the case in the last decade.
